QUALITY FABRICS

B/h. Ahmedabad New Cotton Mill No. 2, Nr. Yogeshwar Estate, Amraiwadi Road, Ahmedabad-380026, Gujarat, India. Tel : +91-79-22774296 Email : contact@acmecotsyn.com

We Acme Cotsyn Pvt. Ltd, based in Ahmedabad, have setup a weaving plant in Ahmedabad's Amraiwadi area, and we are having the following infrastructure:

Looms	Tsudokoma, Japan
Quantity of Looms	16
Compressor	Kaesar, Germany
Humidification plant	Custom plant

In the above project we have chosen the piping system from Anjney Tubes Indiaand their Compressed Air piping system **PPCH FR V2** was successfully installed by them in the year 2017.

Recently they conducted an Air Audit at our plant after 1 year, using Digital Pressure Gauges at our factory to assure us of the continued benefits of their Piping system and we jointly with the air audit team of Anjney Tubes India, witnessed the following results:

Pressure Drop	**Only 0.06 Kg/Cm2**

The above pressure after 1 year of installation of the piping is almost negligible and Anjney Tubes India **PPCH FR V2**, has provided us with many other benefits also and we have mentioned them below

Leakages from their piping system and joints	NIL
Moisture formation	NIL as the piping does not heat up and does not attract moisture like other metal piping
Maintenance in machines and accessories	NIL, as we are getting very clean air so all our accessories and machines do not face the problem of maintenance

Based on our experience we recommend the use of Anjney Tubes India **PPCH FR V2** piping in all weaving plants to save energy, thus saving a lot of money.
