We R G Faith Creations Pvt. Ltd. were planning to set up a new weaving plant in Miroli. For our piping requirement of compressed air applications, we approached **Anjney Tubes India** and procured their manufacturing product Energy Saving **PPCH FR Pneumatic Pipeline** for our upcoming project.

We have installed **Anjney PPCH FR Pneumatic Pipes and Fittings** in our new established plant in 2018 through their agency B R Plasto Engineers with the plant capacity as under:

- Type of Industry: Weaving
- No. of Looms: 48
- Compressor Brand: Kaeser
- CFM of Air Compressor: 1450
- Temperature & Pressure: Ambient Temp. and 5 Kg / cm² pressure
- Pipe size used: 160 mm, 110 mm & 32 mm

Since the date of installation, we have observed below mentioned advantages in their pipeline as under:

- ✓ NIL leakage
- ✓ Very less friction loss
- ✓ Least Pressure drop
- ✓ Remarkable energy saving in the pipeline

As per the commitment made by Anjney Tubes India for the energy saving in their pipeline, they conducted the Air Audit in their PPCH FR Pneumatic pipeline free of cost just to ensure the energy saving. And as a result, **WE HAVE OBSERVED 0.02 BAR PRESSURE DROP IN THEIR PIPELINE WHICH IS ALMOST NIL.** The result itself is an assurance that we are saving good amount of Energy in Anjney PPCH FR Pneumatic Pipeline

The observed pressure drop is almost NIL which is essentially leading to Energy Saving in our plant. Not only that, but also we have observed few major benefits such as,

- ✓ **NIL Moisture formation**
- ✓ **NIL Maintenance due to No leakage and rust free air**

Based on the performance of **Anjney PPCH FR Pneumatic Piping**, we would definitely recommend Anjney Tubes India and their energy saving PPCH Pipeline considering their innovative technology and their excellent customer service oriented approach because the product manufactured by them is like a Boon for all textile industries.

For,
R G Faith Creations Pvt. Ltd.
