RAYANI SPINTEX PRIVATE LIMITED

Regd. Office & Mills : Sur. No. 82-1B, DHULIPALLA (Village),
Sattenapalli (Mandal) Guntur Dist. A.P., PIN : 522 412.

Date..... 7/6/18

We Rayani Spinners Ltd located at Guntur were having our spinning unit with capacity of 18,048 Spindles. We were having requirement of compressed air pipeline for our plant so we decided to go with Anjney PPCH FR Pneumatic Piping which we installed in our compressed of Atlascopco Brand having 392. CFM and 7kg pressure as well as Normal. temperature.

Since last 2011. Years, we are using PPCH FR Pneumatic Piping of total 562 meters manufactured by Anjney Tubes India and we are not facing any problem in the pipeline. The pipeline is running in the plant without any leakage and pressure drop. Even we did not face any corrosion or rusting problem which usually prevails in conventional pipeline.

Anjney Tubes India has always extended its valuable support towards us for any type of technical commercial parameter. Not only that, but Anjney Tubes India has also conducted the Air Audit in their PPCH Pipeline installed and that too Free of Cost in our plant and we witnessed a pressure drop on only 0.02 which is very much negligible and that has truly led us towards a good amount of energy saving.

We also feel very much satisfied to state that till date, we have not required any maintenance in Anjney brand pipeline and we have never faced leakage problem in the pipeline till date. We highly recommend to all industries and especially all spinning and weaving industries to use only Anjney PPCH FR Pneumatic Pipes and Fittings because Air is the most important element in the textile industries.

The Piping was installed in our new project
