

UNITED POLYFAB GUJARAT LIMITED

(Formerly known as United Polyfab (Unit-II) Pvt. Ltd.)

Survey No. 188, Village : Timba, Taluka Dascroi, Dist. Ahmedabad.
Phone : 7069099623, 7069099624 E-mail : upgl@upgl.in

CIN No. : L18109GJ2010PLC062928

We **United Polyfab Pvt Ltd** are having our Spinning Unit in Timba, Dholka and we are using **Anjney Energy Saving PPCH FR Pneumatic Pipeline** in our newly established unit since 2015.

Anjney Tubes India have done successful installation of their pipeline in our plant having capacity as under:

No. of Spindles:	40,000
Brand of Spindles:	LMW
Compressor Brand:	Elgi
Compressor CFM	700
Temperature & Pressure	Ambient temperature at 6 Bar Pressure
Size of the Pipes used	90 MM Header, 63 MM sub Header & 32 MM Branch

Since the date of installation, we have been observing excellent performance of their product range without any leakage, friction loss and pressure drop. To verify the energy saving as committed by them, they have conducted an Air Audit in our plant with their machine as well as digital pressure gauge. As a result, we have witnessed the result as under:

- **Pressure Drop in Anjney PPCH FR Pneumatic Pipeline: 0.06 Bar**

The observed pressure is almost NIL which is essentially leading to Energy Saving in our plant. Not only that, but also we have observed few major benefits such as,

- ✓ **NIL Moisture formation**
- ✓ **NIL Maintenance due to No leakage and rust free air**

Based on our experience and observation, we would definitely recommend Anjney Tubes India and their energy saving PPCH Pipeline considering their innovative technology and their excellent customer service oriented approach because the product manufactured by them is like a Boon for all textile industries.

For,
United Polyfab Pvt Ltd
(Company Stamp & Sing.)
