Ajay Cotspin
INDUSTRIES

We, Ajay Cotspin Industries have setup a plant for spinning in 2016, in Ahmedabad, Gujarat, our plant has 25,536 Spindles.

During the setup of the plant in 2016, again our choice of piping was Non Metallic PPCH FR piping for compressed air supplied and installed by Anjney Tubes India, recently Anjney Tubes India have conducted an Air Audit at our Unit, also and we witnessed during the Air Audit a Pressure drop of Only 0.04 Kg/Cm2, only which almost negligible,

Also note till date, we have not required any maintenance on the piping nor faced any issues with the Piping, also as the pressure drop is negligible this in a way saves us a lot of money in Energy savings, due to their Non Metallic PPCH FR piping, from Anjney Tubes India and we are happy to recommend the same to other weaving plants upcoming or old to adopt this piping,

Form, Ajay Cotspin Industries

Director

Date: 24th April 2018
