Sub: Letter of appreciation

It was a pleasure to have an association with your organization M/s. Phoenix. We truly appreciate for quality & service which you have been serving since 7 to 8 years for Anjney brand PPRCT FR Pipelines & Fittings, installed at various applications. The entire technical team appreciates the way you speak to them whenever you visit our factory M/s. Sun Pharmaceutical Industries Limited. We too appreciate prompt action subject to deliver the quality with accordance to the media.

Though you are a regular vendor with us. As a small gesture, We are enclosing hereby various service media where we have been procuring & installing Anjney brand Pipelines & Fittings through channel partner M/s. Phoenix. We have approached them with the replacement of existing Pipelines & also procured in Projects since it contains the proven ability to prevent Leakages, Corrosion, Scaling, and Friction, Energy loss that makes 100% sustainable result to the Manufacturing process against the previous piping like Metal & other Plastic Piping.

The scope of services is mentioned below :

Applications	Earlier Piping & MOC	Replaced with Anjney brand	Temp. °C	Pressure kg/cm ²	Duration Year
Chilled Water	Metal	PPRCT FR Piping	+8	3	4
Cooling Water	Metal	PPRCT FR Piping	+30	3	4
Hot Water	Metal	PPRCT FR Piping	+80	3.5	3
ETP Transfer	HDPE	PPRCT FR Piping	+30	3	4
Compressed Air	Metal	PPRCT FR Piping	+7	12	3
Drain Water	HDPE	PPRCT FR Piping	+35	3	3
Low/High COD	HDPE	PPRCT FR Piping	+40	3	4
ML Transfer / Caustic	Metal	PPRCT FR Piping	+40	3	4
Vacuum Line	HDPE	PPRCT FR Piping	760mm of Hg	Vacuum	4

Our observations regarding Anjney Product:

- (1) **PPRCT pipe** is a boon for amateurs. It is easier to install than **metal pipe**, not as heavy and cheaper. **PPRCT pipes** also have insulating properties that prevent condensation on pipes carrying cold water and reduce heat loss through pipes carrying hot water.
- (2) Foremost is the **Corrosion resistance** advantage of **PPRCT Material** over Metal. This results in some obvious, and not so obvious, benefits. More than just being a low **Maintenance valve**, a plastic one will never jam, stick, or fail because of rust or corrosion.
- (3) **Flow rates** are another area where **PPRCT pipe** has an advantage. The interior of this pipe is smooth and clean and it will stay that way year after year. Metal pipe can rust, corrode and **scale - resulting in reduced flow rates and higher pressure drops over time.**
- (4) Often, users are not aware of **the engineering advances** that have been made with regard to **PPRCT piping materials** over the last several years. Users of metal pipe, valves, and fittings are often concerned with what they believe to be the mechanical strength limitations of **Non-metallic plastics**. While it is true that there is no commonly available plastic system that can match the temperature/pressure service levels of metals, significant advances have been made. And **PPRCT pipe systems** are now provide adequate **tensile strength or operation up to 100°C & maintains its pressure bearing capabilities for over 50 years.**
- (5) **Extremely long service life:** PPRCT pipelines are maintenance-free and do not need to be replaced over the **entire lifespan of the system** (at least 25 years). This reduces the need for **maintenance** and repair drastically, hence the **operating and overall costs.**

We sincerely appreciate the hard work put by your company and how involved you are personally to ensure that every product is tested before it is supplied to us and all care is taken to make sure they reach us on time.

Please accept this letter as the formal acknowledgement of your outstanding work and as an appreciation of the services our company Sun Pharmaceutical Industries Limited has received from you.

We wish to recommend the Pipelines & Fittings manufactured by *Anjney Tubes India* as it will be truly time tested, sturdy and customer proven product according to their needs. We, would like to appreciate for the continues R & D to the Pipelines with correspondence to the End user requirements & best wishes for the further development.

Thanking you.
