

Mom. held with

Diamond Textile & Anjany Tubes.

Date:- 29/4/18

As A In Diamond Textile Mills, having 34,000 spindles in spinning dept.

Today we conduct Air Audit to check pressure of Air pipeline which was manufactured by Anjany tubes which supplied in year 2013..

We install pressure measuring equipment at start point of pipe and at end of the pipe line, which is of 6 inches.

We measured at start point is 5.5 kg/cm² & at same time at last point is 5.4 kg/cm². So we found ~~0.1~~ pressure drop of 0.1 kg/cm² in PPH made line..
