Minutes of Meetings

We, JRD Denim Pvt. Limited would like to admit that we have been procured and installed Compressed air pipelines called PPCH FR V2 Flame Retardant Pneumatic Pipelines & Fittings supplied & manufactured by Messer Anjney Tubes India (Ahmedabad) since 04 to 06 months.

With prior approval and discussion from both esteemed organization, we have gave the consent Anjney Tubes India to visit our factory and submit the data of pressure drop through Air audit. As we are running 128 Air jet looms of Tsudokoma with I.R. Compressor. We would like to search the exact pressure drop through out 200 meter of Pipelines with header size of 250mm OD and 200mm OD against Metal Pipelines what they are claiming for.

At conclusion, They have installed testing equipments to the header at both starting and end of pipelines, Surprisingly we have realized 0.06 bar pressure drop with situation of continues production and require air consumption at the valued presence of Mr. Bhavesh Thakkar (Director - Anjney Tubes India) & Mr. Y.K.Gautam (Utility Head - JRD Denim Pvt. Limited) subject to consideration.

This result is with physical inspection done at site.
